CLASSES TUTORED

Lego Engineering

ABOUT THE TUTOR

Hello my name is Mary Barnard. My husband and I are the parents of ten children. My goal in life is to love and honor Jesus in all that I do. I am thankful that I have been enabled to home school my children and have been able to teach them and learn alongside them. We have had the joy of graduating five of them so far and it is a joy to see them lead productive lives in society.

I have a Bachelor of Science Degree in Nursing from Calvin College and I love to learn and share science. It is exciting to help kids learn problem solving through hands-on science. I think that studying science allows for a greater appreciation of the order and beauty of God's creation.

We have been greatly blessed by the classes our children have been able to take at Koinonia and I hope that I can pass that on to other families.
